NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of American National County Mutual Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the State of Texas Department of Insurance.

The Texas Department of Insurance recognizes only statutory accounting practices prescribed by the state of Texas for determining and reporting the financial condition and results of operations of an insurance company for determining its solvency under the Texas Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual, version effective January 1, 2014, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Texas. The state may adopt certain prescribed accounting practices that differ from those found in NAIC SAP.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value					
Common Stock (unaffiliated)	\$ 8,865,127				\$ 8,865,127
Total assets at fair value/NAV	\$ 8,865,127	\$ -	\$ -	\$ -	\$ 8,865,127

There were no transfers between Level 1 and Level 2 fair value hierarchies.

(2) There were no Level 3 securities for the periord ending June 30, 2020.

(3) Transfers between levels, if any, are recognized at the beginning of the reporting period.

(4) As of June 30,2020 the fair value of the Company's investments in Level 1 totaled \$7,302,917 and there were no investments in Level 2 and Level 3. The market values of equity and debt securities are obtained by the Securities Valuation Office of the NAIC and/or various pricing servies. There has been no change in the valuation techniques and related inputs.

(5) The fair value information for derivative assets is included in the above tables.

B. Not Applicable

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 7,167,911	\$ 6,824,072		\$ 7,167,911			
Common Stock	\$ 8,865,127	\$ 8,865,127	\$ 8,865,127				

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

There are some equity and fixed income securities whose market price is obtained from the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners. For those securities that are not priced by the SVO, the price is obtained from independent pricing services.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

Additionally, the Company holds a small amount of fixed maturities that have characteristics that make them unsuitable for matrix pricing. For these fixed securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3. The pricing of certain private placement debt also includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, and are classified in Level 3.

For public common and preferred stocks, the Company receives prices from a nationally recognized pricing service that are based on observable market transactions and these securities are disclosed in Level 1. For certain preferred stock held, current market quotes in active markets are unavailable. In these instances, the Company receives an estimate of fair value from the pricing service that provides fair value estimates for the fixed maturity securities. The service utilizes some of the same methodologies to price the preferred stocks as it does for the fixed maturities. These estimates for equity securities are disclosed in Level 2.

The market value of derivative instruments is obtained by a broker (typically a market maker). Due to the disclaimers that the prices are indicative only, the Company includes these fair value estimates in Level 3.

NOTE 21 Other Items

A. Unusual or Infrequent Items

On March 11, 2020, the World Health Organization formally declared the outbreak of the novel coronavirus COVID-19 to be a pandemic. The spread of COVID-19 has caused illness, quarantines, cancellation of events and travel, business and school shutdowns, reduction in business activity, widespread unemployment, and overall economic and financial market instability. The wide-ranging social, economic and financial consequences of the COVID-19 pandemic and the possible effects of ongoing and future governmental action in response to COVID-19 compound this uncertainty.

Through the second quarter of 2020, the American National Family of Companies continues to be fully operational with the majority of our employees working remotely. We continue to monitor developments related to the COVID-19 pandemic to assess its impact on our business; however, due to the evolving and highly uncertain nature of this event, it currently is not possible to estimate with reasonable confidence the ultimate direct and indirect impact of COVID-19 on our business, results of operations, financial condition, or liquidity. To date, COVID-19 has impacted us most notable with economic uncertainty and volatility in the financial markets in which we invest and with the diminished ability of certain of our clients and borrowers to make timely payments to us. This has resulted in our taking protective measures to mitigate the impact of COVID-19 on performance and increase liquidity should a need arise.

We are monitoring our liquidity needs closely. In the second quarter of 2020, ANICO, and affiliates, deferred salary merit increases.

We issued a 15% policy credit for our personal and commercial auto policyholders based on their April and May premiums, which amounted to approximately \$784 thousand. Additionally, as a result of the impacts of COVID-19, state insurance departments across the country had issued regulations that required us not to cancel policies for non-payment for varying amounts of time but generally for at least 90-day periods which began in March and early April 2020. The cancellation and grace periods have been lifted in most states. At this time, however, our liquidity requirements have been and are expected to continue to be met by funds from operations.

NOTE 22 Events Subsequent

On July 1, 2020, the upstream indirect parent company, American National Insurance Company (“ANICO”) completed its previously announced holding company reorganization pursuant to the Agreement and Plan of Merger dated February 11, 2020 (the “Reorganization Agreement”), among ANICO, American National Group, Inc., a Delaware corporation (“ANAT”), and AN MergerCo, Inc., a Texas corporation (“MergerCo”). The Reorganization Agreement provided for the merger of American National with and into MergerCo (the “Merger”), with ANICO surviving the Merger as a wholly owned subsidiary of ANAT, and the automatic conversion of each share of the common stock, par value \$1.00 per share, of ANICO issued and outstanding immediately prior to the effective time of the Merger (“ANICO Stock”), into one duly issued, fully paid and non-assessable share of the common stock, par value \$0.01 per share, of ANAT (“ANAT Stock”) (collectively with the other transactions contemplated by the Reorganization Agreement, the “Reorganization”).

As a result of the Reorganization, American National Group, Inc. became the publicly held company under the same ticker symbol “ANAT,” on the NASDAQ exchange as previously used by American National Insurance Company. The directors and officers of ANICO just prior to the reorganization are now serving as directors and officers of ANAT. There is no change in the ultimate ownership of the organization and business operations will continue from our current office locations and companies. This reorganization will have no effect on our agents or policyholders.
