ANNUAL STATEMENT FOR THE YEAR 2024 OF THE AMERICAN NATIONAL LIFE INSURANCE COMPANY OF NEW YORK

ANNUAL STATEMENT AS OF DECEMBER 31, 2024 OF THE American National Insurance Company of New York

NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of American National Insurance Company of New York ("the Company") are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services ("DFS").

The DFS recognizes only statutory accounting practices ("SAP") prescribed by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The state has implemented and adopted certain exceptions to the prescribed accounting practices found in the NAIC SAP and the Insurance Commissioner of the State of New York has the right to permit other specific practices that deviate from prescribed practices.

As of the date of this report, the Company has not implemented any such exceptions, has not requested permission for a permitted practice, nor been directed by the State of New York to implement any accounting practice unique to the Company.

The following table presents a reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the State of New York:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates used to prepare financial statements. Future events, which could impact these statements, include changes in the levels of mortality, morbidity, persistency, collectability, recoverability, market performance, interest rates, and potential for an unpredictable outcome in any given lawsuit.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Benefits and expenses are charged to current operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments, which consist of securities with maturity dates at date of purchase of less than one year, are carried at amortized cost.
- (2) Bonds are valued in accordance with the Securities Valuation Office ("SVO") and rules promulgated by the NAIC. For those securities that are not priced by the SVO, the price is obtained from independent pricing services. Bonds not backed by other loans are generally stated at amortized cost using the scientific interest method, except for bonds with an NAIC designation of 6, which are recorded at the lower of amortized cost or estimated fair value.
- (3) Unaffiliated common stocks, are stated at market value, except mutual investments, which are stated at net asset value
- (4) Unaffiliated preferred stocks with NAIC designation of 4-6 are stated at lower of cost or estimated fair value and those with an NAIC designation of 1-3 are stated at cost. Affiliated preferred stocks are carried on the equity basis.
- (5) Mortgage loans are carried at the aggregate unpaid principle balance net of any premiums, discounts and impairments.
- (6) Loan-backed and structured securities are stated at either amortized cost or, when the NAIC rating is 6, at the lower of amortized cost or fair market value. Amortized cost is determined using the retrospective method and includes anticipated prepayments.
- (7) Subsidiaries and affiliates are carried at their underlying audited GAAP equity basis value based on the rules set out in SSAP 97, Investments in Subsidiary, Controlled and Affiliated Entities.
- (8) Joint ventures and limited liability companies are carried at values as determined in accordance with SSAP No. 48, Joint Ventures, Partnerships and Limited LiabilityCompanies.
- (9) All derivative instruments are carried at fair value, net of collateral when right of offset exists.
- (10) The Company did not consider anticipated investment income when calculating its premium deficiency reserves.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and, while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company depreciates all capitalized assets using the straight line method.The Company has not modified its capitalization policy from the prior year.
- (13) The Company does not estimate pharmaceutical rebate receivables. Pharmaceutical rebate receivables are recorded upon invoicing/confirmation.

NOTES TO FINANCIAL STATEMENTS

D. Going Concern

Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern.

NOTE 2 Accounting Changes and Corrections of Errors

A. Accounting Changes

On July 1, 2024, the Company early adopted the Statutory Accounting Principles Working Group update to SSAP 21R, Principles-Based Bond Project & Residual Interests.

The adopted revisions to SSAP 21R prescribe accounting guidance (measurement method) for all residual interests regardless of legal form. The Company has elected the practical expedient to apply the “cost recovery” method, whereby Book/Adjusted Carrying Value (BACV) is calculated such that all distributions received are treated as a reduction in BACV. The Company will not recognize any interest or investment income until the residual tranche has a BACV of zero. Once the residual has a zero BACV, distributions received will be recognized as interest income.

As the Company has historically applied SSAP 48, equity method, to the residuals, the transition guidance requires unrealized gains or losses recognized, to be realized, with the reported value as of June 30, 2024, becoming the July 1, 2024 cost basis (or BACV) for subsequent measurement under this standard. Additionally, at adoption, in accordance with paragraph 36 of SSAP 21R, the residual BACV was adjusted if the fair value was lower than the BACV with the difference between the two being recognized as a realized loss.

If it is determined that the fair value of the residual is less than the BACV, then an other-than-temporary-impairment (OTTI) will be recorded. A realized loss will be recognized equal to the difference between the fair value and the BACV. After the OTTI is recognized, distributions received from the residual will continue to be recorded under the cost recovery method.

The effect of the adoption resulted in the following impacts at the transition date, July 1, 2024:

Financial Statement	Line	Amount
Assets	Page 2, Line 8	\$ 116,084,653
Liabilities		—

NOTES TO FINANCIAL STATEMENTS

NOTE 8 Derivative Instruments

A. Derivatives under SSAP No. 86-Derivatives

(1)-(7) The Company issues indexed deferred annuities and indexed universal life policies which credit returns based on the performance of underlying equity indexes. However, the indexed credits cannot be less than zero. The Company issues policies once a week for annuities and moves available accumulation value to indexed accounts once a month for universal life policies and purchases options at the same time, thereby closely matching the timing and other characteristics of the option assets to the indexed-related liabilities. The Company purchases the options from a number of different well-regarded parties and further mitigates credit risk by negotiating collateral deposit agreements with the counter-parties. All options are stated at fair value and are reported on the Derivatives line on the Asset page net of collateral when right of offset exists. Changes in the values of the options are recorded as changes in unrealized gains.

(8) Not applicable - The Company had no derivative premium payments due or undiscounted future premium commitments.

(9) Not applicable - The Company had no derivative aggregate excluded components.

NOTE 12 Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan

The Company and its' affiliate, Farm Family Casualty Insurance Company, ("the sponsoring companies") sponsor a qualified noncontributory defined benefit pension plan ("the Plan") covering all full-time employees hired prior to January 1, 1997. Effective January 1, 1997, pension plan benefits were frozen.

In January 2024, the Company announced a Retirement Incentive Offer, or Window, to certain eligible employees who have reached age 60 and participate in the Plan. Employees who elect to accept the offer will receive a pension benefit that was enhanced by an additional 1% for each year of service and continued health insurance coverage or medical cash benefits subject to conditions. For employees accepting the offer, final date of employment generally was February 29, 2024. An additional liability of \$48,000 was established by Farm Family Casualty Insurance Company, via transfer from the Plan, to account for the continued health insurance coverage and medical cash benefits for these employees, of which \$18,000 remains as of December 31, 2024.

The sponsoring companies sponsor a postretirement life insurance plan for retired employees meeting certain age and length of service requirements. Effective December 31, 2002, eligibility for benefits was frozen to provide benefits only to employees who met certain age and service requirements as of December 31, 2002, and to retirees who were

retired as of December 31, 2002. Benefits under the postretirement life insurance plan are provided by a group term life insurance policy issued by an affiliate, American National Insurance Company.

The sponsoring companies sponsor a postretirement health plan for certain retirees. Eligibility for benefits under this plan was frozen effective December 31, 2002 to include only retirees receiving benefits under the plan as of December 31, 2002.

The Company accrues pension benefit cost and postretirement benefit cost in accordance with SSAP No. 102, and SSAP No. 92, respectively.

(17) Not applicable - There is no surplus impact to reflect the full obligation as it is already recognized.

B. Investment Strategies for Plan Assets

The investment policy guidelines for the plan are stated as a maximum guideline percentage of the total assets for each asset category. Generally, up to 100% of total plan assets can be invested in fixed income bonds or cash and cash equivalents, and up to 80% of total plan assets can be invested in equities. The plan primarily invests in bond and equity mutual funds to diversify holdings across entities and market sectors. The plan does not invest in real estate or derivative instruments. The unallocated group annuity contract is a group deposit administration contract issued by the Company which is used to pay plan benefits.

C. The fair value of each class of plan assets

(1) Fair Value Measurements of Plan Assets at Reporting Date

Description for each class of plan assets	(Level 1)	(Level 2)	(Level 3)	Total
Short-term investments	\$ 353,907	\$ —	\$ —	\$ 353,907
Mutual funds	30,046,449	—	—	30,046,449
Unallocated group annuity contract	—	1,345,293	—	1,345,293
Total Plan Assets	\$ 30,400,356	\$ 1,345,293	\$ —	\$ 31,745,649

(2) Information about pension plan assets:

The Company follows a three-level hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

A complete description of the input levels is shown in Note 20 - Fair Value Measurement. A brief description is as follows:

Level 1 – Quoted prices in active markets for identical assets

Level 2 – Valuation techniques based on observable market data

Level 3 – Valuation techniques incorporating information other than observable market data

All registered mutual fund investments are classified in Level 1 of the fair value hierarchy as quoted prices are readily available. The investments are redeemable daily. The unallocated group annuity contract is valued at contract value, which approximates fair value. Contract value represents contributions made under the contracts, plus interest at the contract rate, less funds used to pay retirement benefits.

D. Basis of Long Term Rate of Return on Plan Assets

The overall expected long-term rate-of-return-on-assets assumption is based upon a building-block method, whereby the expected rate of return on each asset class is broken down into three components. The three components are: (1) inflation, (2) the real risk-free rate of return (i.e. the long-term estimate of future returns on default-free U.S. government securities), and (3) the risk premium for each asset class (i.e. the expected return in excess of the risk-free rate). All three components are based primarily on historical data, with modest adjustments to take into account additional relevant information that is currently available. For the inflation and risk-free return components, the most significant additional information is that provided by the market for nominal and inflation-indexed U.S. Treasury securities. That market provides implied forecasts of both the inflation rate and the risk-free rate for the period over which currently available securities mature. The historical data on risk premiums for each asset class is adjusted to reflect any systemic changes that have occurred in the relevant markets; e.g., the higher current valuations for equities, as a multiple of earnings, relative to the longer-term average for such valuations. While the precise expected return derived using the above approach will fluctuate somewhat from year to year, the Company's policy is to hold this long-term assumption constant as long as it remains within a reasonable tolerance from the derived rate.

E. Defined Contribution Plan

The Company's affiliate, American National Insurance Company ("ANICO"), sponsors a defined contribution savings plan under which the Company contributes a 100% match of the first 5% contributed by the employee. The Company's contribution to the plan was \$34,667 and \$29,962 for 2024 and 2023 respectively. At December 31, 2024 the fair value of the plan assets was approximately \$404,705,260.

The amount of the accrued liability for anticipated assessments was \$36,731 and \$12,872 at December 31, 2024 and 2023. The Company expects to pay guaranty fund assessments in the period in which they are received and related premium tax credits would begin in and be recognized over the period allowed by each state.

(b) Decreases current year: Utilization and write-off tax offsets		5,653
(c) Increases current year: Assessments capitalized during the year		36,797

D. Claims related extra contractual obligations and bad faith losses stemming from lawsuits

There were no claims related to extra contractual obligation and bad faith losses stemming from lawsuits during the reporting period.

E. Joint and Several Liabilities

The Company reported no joint and several liabilities during the reporting period.

F. All Other Contingencies

The Company, consistent with the insurance industry in general, is a defendant in various lawsuits, which may from time to time concern alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain of these lawsuits may include claims for compensatory and punitive damages. We provide accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing the existing litigation with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on American National's condensed consolidated financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. These lawsuits are in various stages of development, and future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our condensed consolidated financial position, liquidity, or results of operations. With respect to the existing litigation, management currently believes that the possibility of a material judgment adverse to American National is remote. Accruals for losses are established whenever they are probable and reasonably estimable. If no one estimate within the range of possible losses is more probable than any other, an accrual is recorded based on the lowest amount of the range.

NOTE 15 Leases

The Company had no lessee lease agreements.

B. Lessor Leases

(3) Transfers between levels, if any, are recognized at the end of the reporting period.

(4) During the current reporting period, the fair value of the Company's investments in Level 3 totaled \$9,396,639. The market values held as equity and fixed income securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The fair value information for derivative assets are included in the above tables.

B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. American National has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.
- Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect American National's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

Bonds - The Company utilizes a pricing service to estimate fair value measurements. The fair value for fixed maturity securities that are disclosed as Level 1 measurements are based on unadjusted quoted market prices for identical assets that are readily available in an active market. The estimates of fair value for most fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received from the pricing service. The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

The Company can hold a small amount of private placement debt and fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3.

Preferred and Common Stock - For public preferred and common stocks, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements. For certain preferred stock, current market quotes in active markets are unavailable. In these instances, an estimated fair value is received from the pricing service. The service utilizes similar methodologies to price preferred stocks as it does for fixed maturity securities. If applicable, these estimates would be disclosed as Level 2 measurements. The Company tests the accuracy of the information provided by reference to other services annually. The majority of the Company's common stock is related to the FHLB stock as described in Note 14 - Contingencies. Since there isn't an observable market for the FHLB, these securities are held at cost and disclosed in Level 3.

Derivatives - Certain over the counter equity options are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility and forward price/dividend assumptions. Other primary inputs include interest rate assumptions (risk-free rate assumptions), and underlying equity quoted index prices for identical or similar assets in markets that exhibit less liquidity relative to those markets.

Short-term investments - Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

For other financial instruments discussed below, the Company believes that their carrying value approximates fair value. This assumption is supported by the qualitative information discussed below. These financial instruments are classified as Level 3 measurements.

Mortgage Loans - The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan-by-loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to

NOTES TO FINANCIAL STATEMENTS

arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property type, lien priority, payment type and current status.

Policy Loans - The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, the Company believes the carrying value of policy loans approximates fair value. These investments are classified as Level 3 measurements.

Investment Contracts - The carrying value of investment contracts liability is equivalent to the accrued account balance. The accrued account balance consists of deposits, net of withdrawals, plus or minus interest credited, fees and charges assessed and other adjustments. The Company believes that the carrying value of investment contracts approximates fair value because the majority of these contracts' interest rates reset at anniversary. These financial liabilities are classified as Level 3 measurements.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.
