NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of American National Life Insurance Company of Texas (the Company) are presented on the basis of accounting practices prescribed or permitted by the State of Texas Department of Insurance.

The Texas Department of Insurance recognizes only statutory accounting practices prescribed by the State of Texas for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Texas insurance law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Texas. The State may adopt certain prescribed accounting practices that differ from those found in NAIC SAP.

B. Use of Estimates in the Preparation of the Financial Statements

No significant change.

- C. Accounting Policy
 - (1) No significant change.
 - (2) Bonds not backed by other loans, with the NAIC rating of 6, are stated at the lower of amortized cost or SVO market value; all other NAIC ratings are carried at amortized cost using the interest method.
 - (3) (5) No significant change.
 - (6) Loan-backed securities are carried at amortized cost using the prospective method including anticipated prepayments at the date of purchase.
 - (7) (13) No significant change.
- D. Going Concern

Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company's ability to continue as a going concern as of September 30, 2019.

NOTE 2 Accounting Changes and Corrections of Errors

- D. Loan-Backed Securities
 - (1) Prepayment assumptions for mortgage-backed/asset-backed securities were obtained from independent third party pricing services or internal estimates.
 - (2) At September 30, 2019, the Company did not have any securities within the scope of SSAP No. 43R with a recognized other-than-temporary impairment due to the intent to sell or an inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis.
 - (3) At September 30, 2019, the Company did not hold any loan-backed and structured securities with a recognized credit-related other-than-temporary impairment.
 - (4) Unrealized loss/ fair value information: Not applicable.
 - (5) All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. As of September 30, 2019, the Company believes it has the intent and ability to hold these securities long enough to allow the cost basis of these securities to be recovered. Although the investment securities above did not meet management's criteria for other-than-temporary impairment at this time, it is possible that future events or information could cause them to conclude that declines in value are other-than-temporary.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions

The Company has no dollar repurchase agreements.

NOTE 20 Fair Value Measurements

Α

- (1) There were no assets measured and reported at fair value for the nine months ended September 30, 2019. There were no transfers between Level 1 and Level 2 fair value hierarchies.
- (2) There were no Level 3 securities for the period ending September 30, 2019.
- (3) Transfers between levels, if any, are recognized at the beginning of the reporting period.
- (4) As of September 30, 2019, the Company did not report any investments at fair value in Level 2 or Level 3. The market values held as equity securities and fixed income securities are obtained by the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners and/or various pricing services. There has been no change in the valuation techniques and related inputs.
- (5) The Company does not own any derivative securities.
- B. Not applicable.
- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

	Aggregate					Net Asset Value	Not Practicable
Type of Financial Instrument	Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	(NAV)	(Carrying Value)
Bonds	\$ 116,176,701	\$ 112,831,896		\$ 116,176,701			

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. In accordance with SSAP 100, a fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

There are some equity and fixed income securities whose market price is obtained from the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners. The price origin, classification and NAIC Designation files in the Automated Valuation Service+ (AVS) security records are utilized to determine the fair value hierarchy levels. For those securities that are not priced by the SVO, the price is obtained from independent pricing services.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

Additionally, the Company holds a small amount of fixed maturities that have characteristics that make them unsuitable for matrix pricing. For these fixed securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3. The pricing of certain private placement debt also includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, and are classified in Level 3.

The Company holds no other investments subject to SSAP 100 - Fair Value.

D. Not Practicable to Estimate Fair Value

Not applicable.

E. The Company had no investments measured using Net Asset Value.

NOTE 24 Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company had no retrospectively rated contracts or contracts subject to redetermination during the reporting period.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

Claim Liabilities and Reserves as of December 31, 2018 were \$7.8 million. As of September 30, 2019, \$5.2 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Claims liabilities and reserves remaining as of September 30, 2019 are now \$0.6 million as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been \$2.0 million of favorable prior-year development from December 31, 2018 to September 30, 2019. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.
