NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Farm Family Casualty Insurance Company ("the Company") are presented in conformity with Statutory Accounting Principles ("SAP") and on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the state of New York for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of New York ("NY SAP"). The state has implemented and adopted certain exceptions to the prescribed or permitted accounting practices found in NAIC SAP *Statement of Statutory Accounting Principles* ("SSAP") and the Superintendent of the NYDFS has the right to permit other specific practices that deviate from prescribed practices ("permitted practice"). While differences exist between NAIC SAP and NY SAP, those differences do not apply to the Company. As of the date of this report, the Company has not implemented any such exceptions, has not requested permission for a permitted practice, nor been directed by the state of New York to implement any accounting practice unique to the Company.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the state of New York is shown below:

(2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

Not applicable - There were no level 3 securities for the reporting period ending June 30, 2024.

(3) Transfer between levels, if any, are recognized at the beginning of the reporting period.

(4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The Company does not own any derivative securities.

B. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value Measurements*. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

Level 1: Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.

Level 3: Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Company is responsible for the determination of fair value and the supporting assumptions and methodologies. The Company gains assurance that assets and liabilities are appropriately valued through the execution of various processes and controls designed to ensure the overall reasonableness and consistent application of valuation methodologies, including inputs and assumptions, and compliance with accounting standards. For fair values received from third parties or internally estimated, the Company's processes and controls are designed to ensure that the valuation methodologies are appropriate and consistently applied, the inputs and assumptions are reasonable and consistent with the objective of determining fair value, and the fair values are accurately recorded. For example, on a continuing basis, the Company assesses the reasonableness of individual fair values that have stale security prices or that exceed certain thresholds as compared to previous fair values received from valuation service providers or brokers or derived from internal models.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three- level fair value hierarchy as described above in the Note 20B.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 1,007,084,494	\$ 1,006,960,161	\$ 1,959,862	\$ 1,005,124,632	\$ —	\$ —	\$ —
Common stocks	\$ 234,356,886	\$ 234,356,886	\$ 233,481,528	\$ —	\$ —	\$ 875,358	\$ —
Mortgage loans	\$ 27,800,913	\$ 27,919,363	\$ —	\$ —	\$ 27,800,913	\$ —	\$ —
Cash, cash equivalents and short-term investments	\$ 269,304,968	\$ 269,304,968	\$ 269,304,968	\$ —	\$ —	\$ —	\$ —
Other invested assets	\$ 4,500,000	\$ 4,500,000	\$ —	\$ —	\$ 4,500,000	\$ —	\$ —

The estimated fair values of the financial instruments presented above are determined by the Company using market information available as of the end of the current quarter. Considerable judgment is required to interpret market data in developing the estimates of fair value for financial instruments for which there are no available market value quotations. The estimates presented are not necessarily indicative of the amounts the Company could realize in a market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Unadjusted quoted prices for these securities are provided to the Company by independent pricing services. Cash included in Level 1 represents cash on hand.

Level 2 financial instruments

Bonds included in Level 2 are valued principally by third party pricing services using market observable inputs. Because most bonds do not trade daily, independent pricing services regularly derive fair values using recent trades of securities with similar features. When recent trades are not available, pricing models are used to estimate the fair values of securities by discounting future cash flows at estimated market interest rates. Typical inputs to models used by independent pricing services include but are not limited to benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. Additionally, for loan-backed and structured securities, valuation is based primarily on market inputs including benchmark yields, expected prepayment speeds, loss severity, delinquency rates, weighted average coupon, weighted average maturity and issuance specific information. Issuance specific information includes collateral type, payment terms of underlying assets, payment priority within the tranche, structure of the security, deal performance and vintage of loans.

Level 3 financial instruments

Valuation techniques for bonds included in Level 3 are generally the same as those described in Level 2 except that the techniques utilize inputs that are not readily observable in the market, including illiquidity premiums and spread adjustments to reflect industry trends or specific credit-related issues. The Company assesses the significance of unobservable inputs for each security and classifies that security in Level 3 as a result of the significance of unobservable inputs.

STATEMENT AS OF SEPTEMBER 30, 2024 OF THE Farm Family Casualty Insurance Company

NOTES TO FINANCIAL STATEMENTS

The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan-by-loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property type, lien priority, payment type and current status.

Other invested assets include collateral loans that are carried at unpaid principal. The Company believes carrying value approximates fair value and are classified as Level 3.

LIHTC Investments are also included in other invested assets. The Company believes the carry value of these investments approximates fair value.

D. Not Practicable to Estimate Fair Value

As of September 30, 2024, there were no financial instruments for which it is not practicable for the Company to estimate their fair value.
