NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Garden State Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the State of Texas Department of Insurance.

The Texas Department of Insurance recognizes only statutory accounting practices prescribed by the State of Texas for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Texas insurance law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Texas. The State may adopt certain prescribed accounting practices that differ from those found in NAIC SAP.

NOTE 20 Fair Value Measurements

- A. Fair Value Measurements at Reporting Date
 - (1) There were no assets measured and reported at fair value for the three months ended March 31, 2020. There were no transfers between Level 1 and Level 2 fair value hierarchies.
 - (2) There were no level 3 securities for the period ending March 31, 2020.
 - (3) Transfers between level, if any, are recognized at the beginning of the reporting period.
 - (4) As of March 31, 2020, the Company did not report any investments at fair value in Level 2 or Level 3. The market values held as equity securities and fixed income securities are obtained by the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners and/or various pricing services. There has been no change in the valuation techniques and related inputs.
 - (5) Not applicable.
- B. Not applicable.
- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 120 259 827	\$ 124 770 408		\$ 120 259 827			

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

There are some equity and fixed income securities whose market price is obtained from the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners. For those securities that are not priced by the SVO, the price is obtained from independent pricing services.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

Additionally, the Company can hold a small amount of fixed maturities that have characteristics that make them unsuitable for matrix pricing. For these fixed securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3. The pricing of certain private placement debt also includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, and are classified in Level 3.

The Company holds no other investments subject to SSAP 100 - Fair Value.

D. Not Practicable to Estimate Fair Value

As of March 31, 2020, there were no financial insruments for which it is not practicable for the Company to estimate fair value.

E. Investments measured using Net Asset Value

The Company had no investments measured using net asset value.

NOTE 21 Other Items

No significant change.

NOTE 22 Events Subsequent

We are closely monitoring developments related to the COVID-19 pandemic to assess its impact on our business; however, due to the evolving and highly uncertain nature of this event, it currently is not possible to estimate the direct and indirect impact of COVID-19 on our business, results of operations, financial condition, or liquidity. COVID-19, or other major public health issues, could impact us in a number of ways including, the adverse impact on market volatility, the affect to our workforce which could impact the ability to conduct business, and the potential for an increase in claims and reinsurance costs. Further, we cannot predict how legal and regulatory responses to concerns about COVID-19 or other major public health issues, including the possible extension of insurance coverage beyond our policy language, will impact our business. We are continuing normal operations, but with a majority of our employees working remotely.

Liquidity

The COVID-19 pandemic created significant economic uncertainty and volatility in the credit and capital markets beginning in March 2020, which has persisted. On April 13, 2020, the parent company, American National Insurance Company ("American National"), borrowed from the Federal Home Loan Bank of Dallas' COVID-19 Relief Advance Program. The net amount of the advance was approximately \$240 million after a required capital stock purchase of approximately \$10 million. The loan has an interest rate of 0.25% with a final maturity date of October 13,2020. On April 28, 2020, the Company took an additional advance from the Federal Home Loan Bank of Dallas. The net amount of the advance was approximately \$245 million after a required capital stock purchase of approximately \$5 million. The loan has an interest rate of 0.38% with a final maturity date of April 28, 2021. We are closely monitoring the effect of the COVID-19 pandemic on our operations and our customers. While we believe current capital is sufficient to support operations, American National took the advance from the FHLB in the event additional liquidity is needed for potential operational needs. Should American National require additional liquidity to respond to the effects of COVID-19, we currently have approximately \$622 million of additional credit available to us from the FHLB.

Other

In response to the impacts of COVID-19, state insurance departments across the country have issued regulations that require us to not cancel policies for nonpayment for varying amounts of time but generally for at least 60 day periods which began in March and early April 2020. As a result, we expect to see a reduction in the cash flows typically received from policyholders during these periods.

NOTE 23 Reinsurance

No significant change

NOTE 24 Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company had no retrospectively rated contracts or contracts subject to redetermination.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

Claim liabilities and reserves as of December 31, 2019 were \$3.1 million. As of March 31, 2020, \$0.7 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Claims liabilities and reserves remaining as of March 31, 2020 are now \$1.9 million as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been \$0.5 million of favorable prior-year development from December 31, 2019 to March 31, 2020. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.

NOTE 26 Intercompany Pooling Arrangements

The Company had no intercompany pooling arrangements.
