- (5) Not applicable.

**B. Not applicable.**
**C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.**

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 345,592,342	\$ 353,348,681	\$ 2,119,842	\$ 343,472,501	\$ -		
Mortgage Loans	\$ 23,978,427	\$ 24,123,716	\$ -	\$ -	\$ 23,978,427		
Policy Loans	\$ 2,968,460	\$ 2,968,460			\$ 2,968,460		
Investment Contracts	\$ 18,182				\$ 18,182		

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. In accordance with SSAP 100R, a fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

Equity and fixed income securities are priced by independent pricing services. The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The estimates of fair value for most fixed maturity investments, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes.

The Company can hold a small amount of private placement debt and fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3.

For publicly-traded equity securities, prices are received from a nationally recognized pricing service that is based on observable market transactions, and these securities are classified as Level 1 measurements.

The Company holds no other investments subject to SSAP 100R – Fair Value.

## NOTES TO FINANCIAL STATEMENTS

The fair value of mortgage loans is estimated using discounted cash flow analyses on a loan by loan basis by applying a discount rate to expected cash flows from future installment and balloon payments. The discount rate takes into account general market trends and specific credit risk trends for the individual loan. Factors used to arrive at the discount rate include inputs from spreads based on U.S. Treasury notes and the loan's credit quality, region, property type, lien priority, payment type and current status. Mortgage loans are classified as Level 3 investments.

For other financial instruments discussed below, the Company believes that their carrying value approximates fair value. This assumption is supported by the qualitative information discussed below. These financial instruments are classified as Level 3 measurements.

The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, the Company believes the carrying value of policy loans approximates fair value. Policy loans are classified as Level 3 investments.

The carrying value of investment contracts liability is equivalent to the accrued account balance. The accrued account balance consists of deposits, net of withdrawals, plus or minus interest credited, fees and charges assessed and other adjustments. The Company believes that the carrying value of investment contracts liability approximates fair value because the majority of these contracts' interest rates reset at anniversary.

### D. Not Practicable to Estimate Fair Value

As of March 31, 2022, there were no financial instruments for which it is not practicable for the Company to estimate fair value.

### E. Investments measured using Net Asset Value

The Company had no investments measured using net asset value.

## NOTE 21 Other Items

### A. Unusual or Infrequent Items

On March 11, 2020, the World Health Organization formally declared the outbreak of the novel coronavirus COVID-19 to be a pandemic. Below is a summary of significant subsequent developments in our COVID-19 response:

We continue to take steps to protect employees with the goals of maintaining their health and sustaining an adequate workforce, including employees working from home and offering flexibility for employees negotiating scheduling conflicts due to the impacts of COVID-19, such as caring for family, alternative arrangements and shutdowns for business and schools, self-isolation or personal illness, including granting additional paid time off for vaccinations and to address these hardships. Additionally, we closely monitor and align with federal, state, and local health mandates for the protection of our onsite workers (masking, social distancing, etc.).

We suspended our summer Internship Program for 2020. In 2021, we piloted a hybrid program which combined virtual and in-person elements for a small group of interns. In 2022, we will offer a hybrid program for an expanded group of interns.

We have recently updated return-to-office plans for our locations. Beginning in early April 2022, we began to gradually introduce more employees to our office locations. While some employees have positions requiring them to work onsite, others can work hybrid schedule, with their management team's approval.

Although we have been able to maintain our business operations since the onset of the pandemic, no assurance can be given that these actions will continue to be successful, nor can we predict the level of disruption that will occur should the COVID-19 pandemic and its related macroeconomic risks continue for further extended periods of time. Given this uncertainty, we are unable to quantify with reasonable confidence the total expected impact of the COVID-19 pandemic on our future operations, financial condition, liquidity and results of operations. The wide-ranging social, economic and financial consequences of the COVID-19 pandemic and the possible effects of ongoing and future governmental action in response to COVID-19 compound this uncertainty.

Additionally, as a result of the impacts of COVID-19, state insurance departments across the country issued regulations that required us not to cancel policies for non-payment for varying amounts of time but generally for at least 90-day periods which began in March and early April 2020. The cancellation and grace periods have been lifted in all states.

Thus far, throughout the pandemic, we believe we have successfully navigated the risks associated with COVID-19 and have been able to successfully maintain our business operations. However, as the pandemic continues, the extent to which COVID-19 impacts our business, results of operations, financial condition, or liquidity will depend on future developments which remain highly uncertain.

As a result of the economic impact associated with COVID-19, the Company modified one retail loan in the third quarter of 2020 with a balance of \$2.5 million. The modification included two months forbearance of principal and interest payments and three months of interest only payments. The Company did not make any additional loan modifications during 2021.

As of March 31, 2022, \$5.4 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$6.6 million as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been \$2.6 million of favorable prior-year development from December 31, 2021 to March 31, 2022. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.
