NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of United Farm Family Insurance Company (the "Company") are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services.

The New York State Department of Financial Services recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of New York.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices or permitted by the State of New York as of December 31, 2019 and December 31, 2018 is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments, which consist of securities with maturity dates at date of purchase of less than one year, are stated at amortized cost.
- The Company has no investment in mandatory convertible securities or SVO identified investments. Bonds not backed by other loans, with NAIC ratings of 3-6, are stated at the lower of amortized cost or SVO market value; all other NAIC ratings are stated at amortized cost using the modified scientific method.
- The Company has no investment in common stocks.
- The Company has no investment in preferred stocks.
- The Company has no mortgage loans.
- Loan-backed securities are stated at amortized cost using the retrospective method.
- The Company has no investments in subsidiaries, controlled, or affiliated companies.
- The Company does not invest in joint ventures, partnerships or limited liability companies.
- The Company does not invest in derivatives.
- The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property/ Casualty Contracts – Premiums.
- Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability, are continually reviewed and any adjustments are reflected in the period determined. In addition, the Company has a contract with an unaffiliated company to administer and settle the Company's workers compensation claims. The third party administrator determines the appropriate individual case estimates and settles the claims.
- The Company depreciates all capitalized assets using the straight line method. The Company has not modified its capitalization policy from the prior year.
- The Company has no pharmaceutical rebate receivables.

D. Going Concern

Based upon its evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

NOTE 2 Accounting Changes and Corrections of Errors

The Company recognized an increase to its' current tax liability of \$111,361. The Company also recognized an increase to its' net deferred tax asset of \$126,000. These changes were made subsequent to the filing of the 2018 Annual Statement and were related to corrections and adjustments to prior year activity. The impact in 2019 is an increase to surplus of \$14,639. These corrections were calculated and recorded in the Company's 2018 audited financial statements.

- At December 31, 2019, the Company did not hold any loan-backed and structured securities with a recognized credit-related other-than-temporary impairment.
- There are no impaired securities for which an other-than-temporary impairment has not been recognized in earnings as a realized loss.
- All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. As of December 31, 2019, the Company believes it has the intent and ability to hold securities long enough to allow the cost basis of these securities to be recovered. NOTE 20 Fair Value Measurements

|--|-----------|-----------|-----------|-----------------------|-------|
| b. Liabilities at fair value | | | | | |
| Total liabilities at fair value | \$ - | \$ - | \$ - | \$ - | \$ - |
- (2) There were no Level 3 securities for period ending December 31, 2019.
- (3) Transfer between levels, if any, are recognized at the beginning of the reporting period.
- (4) The market values of equity and debt securities are obtained by the Securities Valuation Office of the NAIC and/or various pricing services. There has been no change in the valuation techniques and related inputs.
- (5) The Company does not own any derivative securities.
- B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

There are some equity and fixed income securities whose market price is obtained from the Securities Valuation Office (SVO) of the National Association of Insurance Commissioners. For those securities that are not priced by the SVO, the price is obtained from independent pricing services.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

NOTES TO FINANCIAL STATEMENTS

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

The Company has no Level 3 securities for the period ending December 31, 2019. However, for any fixed securities that have characteristics that make them unsuitable for matrix pricing, a quote from a broker (typically a market maker) would be obtained. Due to the disclaimers on these quotes that indicate that the price is indicative only, the Company would include these fair value estimates in Level 3. Also, since, the pricing of certain private placement debt includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, these securities would also be classified in Level 3.

- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.
