NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices
The financial statements of United Farm Family Insurance Company (the “Company”) are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services.

The New York State Department of Financial Services recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures Manual, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of New York.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices or permitted by the State of New York as of December 31, 2020 and December 31, 2019 is shown below:

B. Use of Estimates in the Preparation of the Financial Statements
The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy
Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments, which consist of securities with maturity dates at date of purchase of less than one year, are stated at amortized cost.
- The Company has no investment in mandatory convertible securities or SVO identified investments, Bonds not backed by other loans, with NAIC ratings of 3-6, are stated at the lower of amortized cost or SVO market value; all other NAIC ratings are stated at amortized cost using the modified scientific method.
- The Company has no investment in common stocks.
- The Company has no investment in preferred stocks.
- The Company has no mortgage loans.
- Loan-backed securities are stated at amortized cost using the retrospective method.
- The Company has no investments in subsidiaries, controlled, or affiliated companies.
- The Company does not invest in joint ventures, partnerships or limited liability companies.
- The Company does not invest in derivatives.
- The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property/ Casualty Contracts – Premiums.
- Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability, are continually reviewed and any adjustments are reflected in the period determined. In addition, the Company has a contract with an unaffiliated company to administer and settle the Company’s workers compensation claims. The third party administrator determines the appropriate individual case estimates and settles the claims.
- The Company depreciates all capitalized assets using the straight line method. The Company has not modified its capitalization policy from the prior year.
- The Company has no pharmaceutical rebate receivables.

| Total liabilities at fair value | \$ - | \$ - | \$ - | \$ - | \$ - |
- (2) There were no Level 3 securities for period ending December 31, 2020.
- (3) Transfer between levels, if any, are recognized at the beginning of the reporting period.
- (4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.
- (5) The Company does not own any derivative securities.
- B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

The Company has no Level 3 securities for the period ending December 31, 2020. However, for any fixed securities that have characteristics that make them unsuitable for matrix pricing, a quote from a broker (typically a market maker) would be obtained. Due to the disclaimers on these quotes that indicate that the price is indicative only, the Company would include these fair value estimates in Level 3. Also, since, the pricing of certain private placement debt includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, these securities would also be classified in Level 3.

- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.
- The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 8,744,856	\$ 8,555,970		\$ 8,744,856

NOTE 21 Other Items

- A. Unusual or Infrequent Items
- On March 11, 2020, the World Health Organization formally declared the outbreak of the novel coronavirus COVID-19 to be a pandemic. The spread of COVID-19 has caused illness, quarantines, cancellation of events and travel, business and school shutdowns, reduction in business activity, widespread unemployment, and overall economic and financial market instability. The wide-ranging social, economic and financial consequences of the COVID-19 pandemic and the possible effects of ongoing and future governmental action in response to COVID-19 compound this uncertainty.
- Through December 31, 2020, the American National Family of Companies continues to be fully operational with the majority of our employees working remotely. We continue to monitor developments related to the COVID-19 pandemic to assess its impact on our business; however, due to the evolving and highly uncertain nature of this event, it currently is not possible to estimate with reasonable confidence the ultimate direct and indirect impact of COVID-19 on our business, results of operations, financial condition, or liquidity. To date, COVID-19 has impacted us most notable with economic uncertainty and volatility in the financial markets in which we invest and with the diminished ability of certain of our clients and borrowers to make timely payments to us. This has resulted in our taking protective measures to mitigate the impact of COVID-19 on performance and increase liquidity should a need arise.
- We are monitoring our liquidity needs closely. Sales growth in our operating segments was negatively impacted by stay-at-home orders and the increased economic uncertainty caused by COVID-19.

NOTES TO FINANCIAL STATEMENTS

We issued a 15% policy credit for our personal and commercial auto policyholders based on their April and May premiums, which amounted to approximately \$0.8 million. Additionally, as a result of the impacts of COVID-19, state insurance departments across the country had issued regulations that required us not to cancel policies for non-payment for varying amounts of time but generally for at least 90-day periods which began in March and early April 2020. The cancellation and grace periods have been lifted in most states. At this time, however, our liquidity requirements have been and are expected to continue to be met by funds from operations.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

	2020	2019
Losses and Loss adjustment expense liability at January 1	10,993,568	10,483,963
Incurred related to current year	6,043,679	6,547,125
Incurred related to prior year	(279,293)	(514,000)
Subtotal incurred	5,764,386	6,033,125
Paid related to current year	2,178,376	2,535,520
Paid related to prior year	2,707,409	2,988,000
Subtotal paid	4,885,785	5,523,520
Losses and Loss adjustment expense liability at December 31	11,872,170	10,993,568

- A. Incurred losses and loss adjustment expenses attributed to insured events of prior years have decreased by \$279,293 in 2020. This change is the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims and such adjustments are included in current operations.
The Company ("UFF") and Farm Family Casualty ("FFC") currently pool their underwriting results – 98% to FFC and 2% to UFF. Historically, the Incurred But Not Reported ("IBNR") loss adjustment reserves (LAE) have been calculated based on the total pooled business, and then the direct LAE IBNR was allocated to each Company using a pooled percentage.
In May 2020, the LAE IBNR calculation was changed to reflect each Company's direct business. This results in an increase in the direct LAE ratio, and a corresponding increase in the ceded LAE ratio. Without this change, the Company's YTD direct LAE ratio as of December 31, 2020 would have been 6.7%, as compared to the reported direct LAE ratio of 19.1%. There is no impact to either Company's net income, as the results are pooled.
- B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.

NOTE 26 Intercompany Pooling Arrangements

- A. Farm Family Casualty Insurance Company (NAIC Company Code 13803) pools its business as the lead company, and retains 98% of the pooled business. United Farm Family Insurance Company (NAIC Company Code 29963), is a party to the pooling arrangement and retains 2% of the pooled business. No other insurance companies are parties in the pooling arrangement.
- B. All lines of business written by both companies are subject to the pooling arrangement.
- C. Premiums and losses are ceded to non-affiliated reinsurers prior to cession of pooled business to the lead company. Pooled business is net of all business ceded to non-affiliated reinsurers.
- D. Both pool members are parties to reinsurance agreements and have a right of recovery from the non-affiliated reinsurers.
- E. The Company has no discrepancies between entries regarding pooled business on the assumed and ceded reinsurance.
- F. Companies share in accordance with the pooling participation percentage, including losses incurred with the write-off of uncollected reinsurance.
- G. The Company has an amount due to Farm Family Casualty Insurance Co (NAIC Company Code 13803) of \$995,469 and \$3,342,906 from participating in the intercompany pooling agreement as of December 31, 2020 and December 31, 2019, respectively.
