## (2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

There were no Level 3 securities for period ending March 31, 2021.

## (3) Transfer between levels, if any, are recognized at the beginning of the reporting period.

(4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The Company does not own any derivative securities.

## NOTES TO FINANCIAL STATEMENTS

- B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

Equity and fixed income securities are priced by independent pricing services. The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

The Company has no Level 3 securities for the period ending March 31, 2021. However, for any fixed securities that have characteristics that make them unsuitable for matrix pricing, a quote from a broker (typically a market maker) would be obtained. Due to the disclaimers on these quotes that indicate that the price is indicative only, the Company would include these fair value estimates in Level 3. Also, since, the pricing of certain private placement debt includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, these securities would also be classified in Level 3.

- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 8,347,154	\$ 8,216,282		\$ 8,347,154			

- D. Not Practicable to Estimate Fair Value  
As of March 31, 2021, there were no financial instruments for which it is not practicable for the Company to estimate the fair value.
- E. Investments measured using Net Asset Value  
The Company had no investments measured using Net Asset Value.

### NOTE 21 Other Items

#### A. Unusual or Infrequent Items

We cannot predict the level of disruption that will occur should the COVID-19 pandemic and its related macroeconomic risks continue for an extended period of time. Given this uncertainty, we are unable to quantify with reasonable confidence the expected impact of the COVID-19 pandemic on our future operations, financial condition, liquidity and results of operations. The wide-ranging social, economic and financial consequences of the COVID-19 pandemic and the possible effects of ongoing and future governmental action in response to COVID-19 compound this uncertainty. We are monitoring our liquidity needs closely.

Also, as a result of the impacts of COVID-19, state insurance departments across the country had issued regulations that required us not to cancel policies for non-payment for varying amounts of time but generally for at least 90-day periods which began in March and early April 2020. The cancellation and grace periods have been lifted in most states.

At this time, our liquidity requirements have been and are expected to continue to be met by funds from operations.
