STATEMENT AS OF MARCH 31, 2025 OF THE United Farm Family Insurance Company

NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of United Farm Family Insurance Company ("the Company") are presented in conformity with Statutory Accounting Principles ("SAP") and on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the state of New York for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of New York ("NY SAP"). The state has implemented and adopted certain exceptions to the prescribed or permitted accounting practices found in NAIC SAP *Statement of Statutory Accounting Principles* ("SSAP") and the Superintendent of the NYDFS has the right to permit other specific practices that deviate from prescribed practices ("permitted practice"). While differences exist between NAIC SAP and NY SAP, those differences do not apply to the Company. As of the date of this report, the Company has not implemented any such exceptions, has not requested permission for a permitted practice, nor been directed by the state of New York to implement any accounting practice unique to the Company.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the state of New York is shown below:

Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company's ability to continue as a going concern.

NOTE 2 Accounting Changes and Corrections of Errors

Effective January 1, 2025, the Company adopted the NAIC's principle-based bond definition as required by SSAP No. 26R, *Bonds* and SSAP No. 43R, *Asset-Backed Securities* (formerly *Loan-Backed and Structured Securities*). The updated definition clarifies the characteristics of a bond for statutory accounting purposes and establishes principles-based criteria to determine whether a security qualifies as a bond.

Under the new definition, a bond is generally defined as a security that represents a creditor relationship, where the investor is entitled to receive a fixed schedule of one or more payments. A bond must have pre-determined principal and interest payments (whether fixed interest or variable interest) with contractual amounts that do not vary based on appreciation or depreciation of underlying collateral or other non-debt variables. Investments that possess equity-like characteristics were further analyzed based on various characteristics to rebut the presumption that they did not meet the creditor relationship. The principle-based approach emphasizes the assessment of the substance of the investment's structure and the underlying cash flow characteristics, rather than legal form alone.

A key aspect of the new guidance is the requirement to classify bonds as either issuer credit obligations ("ICO"), which are now reported on Schedule D, Part 1, Section 1, or asset-backed securities ("ABS"), which are now reported on Schedule D, Part 1, Section 2. ICOs are obligations backed by the general creditworthiness of an operating entity, while ABS are bonds created for the primary purpose of raising debt capital where repayment is supported primarily by the cash flows from an underlying discrete pool of financial assets or cash generating non-financial assets. For ABS, the bonds were further evaluated to ensure they had substantive credit enhancement and, if the underlying collateral was cash-generating non-financial assets, that they met the meaningful cash flow criteria.

As a result of implementing the new bond definition, the Company conducted a comprehensive review of its investment portfolio. This review included an assessment of securities previously classified as bonds to determine whether they qualify under the revised definition and whether they are classified as an ICO or ABS. The review resulted in the reclassification of certain securities that no longer meet the definition of a bond effective January 1, 2025 and reported as non-bonds on Schedule BA. The Company also had certain hybrid investments that were reclassified to Schedule BA, Capital Notes.

The review did not result in requiring to reclassify any securities that no longer meet the definition of a bond and did not have any financial impact as of January 1, 2025.

STATEMENT AS OF MARCH 31, 2025 OF THE United Farm Family Insurance Company

NOTES TO FINANCIAL STATEMENTS

Additionally, effective January 1, 2025, the Company adopted the revisions in Ref# 2023-17, which provide clarification for the classification of cash equivalents and short-term investments. The guidance in SSAP 2, Cash, Cash Equivalents, Drafts and Short-Term Investments notes the following investments can no longer be reported as a cash equivalent or short-term investment regardless of maturity date: asset-backed securities, all other invested assets (Schedule BA) including collateral loans and mortgage loans. The Company did not have any short-term investments that were required to be reclassified to long-term as a result of this adoption.

These updates did not result in a change in total invested assets but may impact the accounting treatment and related disclosures of affected securities going forward. The Company has updated its internal investment policies and procedures to reflect the principle-based criteria and continues to monitor guidance issued by the NAIC to ensure ongoing compliance.

The Company had no material corrections of errors during the reporting periods.

D. Loan-Backed Securities

(1) Prepayment assumptions for mortgage-backed/asset-backed securities were obtained from independent third party pricing services or internal estimates.

(2) At March 31, 2025, the Company did not have any securities within the scope of SSAP No 43R with a recognized other-than temporary impairment due to the intent to sell or an inability or lack of intent to retain the security for period of time sufficient to recover the amortized cost basis.

(3) At March 31, 2025, the Company did not hold any loan-backed and structured securities with a recognized credit-related OTTI.

(4) There are no impaired securities for which an other-than-temporary impairment has not been recognized in earning as realized loss.

(5) All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. As of March 31, 2025, the Company believes it has the intent and ability to hold securities long enough to allow the cost basis of these securities to be recovered. Although the investment securities above did not meet management's criteria for other-than-temporary impairment at this time, it is possible that future events or information could cause them to conclude that declines in value are other-than-temporary.

NOTE 20 Fair Value Measurements

A. Fair Value Measurements at Reporting Date

(1) Assets and Liabilities fair value levels of the Fair Value hierarchy

Not applicable - The Company reported no assets or liabilities at fair value or NAV as a practical expedient during the reporting period.

(2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

There were no Level 3 securities for the period ending March 31, 2025.

(3) Transfer between levels, if any, are recognized at the beginning of the reporting period.

(4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The Company does not own any derivative securities.

B. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value Measurements*. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

Level 1: Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.

Level 3: Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Company is responsible for the determination of fair value and the supporting assumptions and methodologies. The Company gains assurance that assets and liabilities are appropriately valued through the execution of various processes and controls designed to ensure the overall reasonableness and consistent application of valuation methodologies, including inputs and assumptions, and compliance with accounting standards. For fair values received from third parties or internally estimated, the Company's processes and controls are designed to ensure that the valuation methodologies are appropriate and consistently applied, the inputs and assumptions are reasonable and consistent with the objective of determining fair value, and the fair values are accurately recorded. For example, on a continuing basis, the Company assesses the reasonableness of individual fair values that have stale security prices or that exceed certain thresholds as compared to previous fair values received from valuation service providers or brokers or derived from internal models.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three- level fair value hierarchy as described above in the Note 20B.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 6,044,751	\$ 6,099,229	\$ 4,048,449	\$ 1,996,302	\$ —	\$ —	\$ —
Cash, cash equivalents and short-term investments	\$ 9,061,162	\$ 9,061,162	\$ 9,061,162	\$ —	\$ —	\$ —	\$ —

The estimated fair values of the financial instruments presented above are determined by the Company using market information available as of the end of the current quarter. Considerable judgment is required to interpret market data in developing the estimates of fair value for financial instruments for which there are no available market value quotations. The estimates presented are not necessarily indicative of the amounts the Company could realize in a market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Level 1 financial instruments

Unadjusted quoted prices for these securities are provided to the Company by independent pricing services. Cash included in Level 1 represents cash on hand.

Level 2 financial instruments

Bonds included in Level 2 are valued principally by third party pricing services using market observable inputs. Because most bonds do not trade daily, independent pricing services regularly derive fair values using recent trades of securities with similar features. When recent trades are not available, pricing models are used to estimate the fair values of securities by discounting future cash flows at estimated market interest rates. Typical inputs to models used by independent pricing services include but are not limited to benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. Additionally, for loan-backed and structured securities, valuation is based primarily on market inputs including benchmark yields, expected prepayment speeds, loss severity, delinquency rates, weighted average coupon, weighted average maturity and issuance specific information. Issuance specific information includes collateral type, payment terms of underlying assets, payment priority within the tranche, structure of the security, deal performance and vintage of loans.

Level 3 financial instruments

Valuation techniques for bonds and cash, cash equivalents, and short-term investments included in Level 3 are generally the same as those described in Level 2 except that the techniques utilize inputs that are not readily observable in the market, including illiquidity premiums and spread adjustments to reflect industry trends or specific credit-related issues. The Company assesses the significance of unobservable inputs for each security and classifies that security in Level 3 as a result of the significance of unobservable inputs.

D. Not Practicable to Estimate Fair Value

As of March 31, 2025, there were no financial instruments for which it is not practicable for the Company to estimate their fair value.

E. Investments measured using Net Asset Value

Not applicable - The Company had no investments measured using Net Asset Value.
